

MARTIN MAN

Full-Stack Developer (AI Integration)

Sai Kung, Hong Kong | +852 5621 7878 | mantszkitmartin@gmail.com | martinman2020.github.io

PROFESSIONAL PROFILE

Full-Stack Developer (3+ years) who owns products end-to-end for a multi-unit NGO: in under two years I delivered 15+ production systems adopted by 50+ service units — an enterprise carbon platform (Next.js + Java, 56 units), an SSO AI portal (18 units), and applied-AI tools on Azure OpenAI, Dify and LangGraph. Grown from a hardware engineering intern into the de-facto product owner of a two-person IT team. HKUST BEng (Computer Engineering, 2:1).

EXPERIENCE

Sep 2024 - Present	Full-Stack Developer (AI Integration) Haven of Hope Christian Service, Hong Kong — 2-person IT team, 50+ service units • CarbonHub: Carbon platform built end-to-end (Next.js + Spring Boot + MySQL), adopted by 56 service units: schema & Flyway migrations, REST API, per-fiscal-year emission formula engine, unit-scoped ACL, async ZIP audit exports, Windows/IIS deploy. • AI Portal + MinutesAI: AI staff portal (Next.js, 18 units) handling SSO, user management and usage credits; ships GrammarAI (grammar/style assistant consuming portal credits) and MinutesAI — upload audio → Azure Speech-to-Text → Dify/LLM minutes → Word/PDF export. • ARS: Attendance & roster system (Laravel + MySQL + SQL Server): Excel punch-machine import, shift/roster rules, department ACL with tests; GitLab CI/CD pipeline building to Windows IIS with secrets kept out of git. • Brand Review AI Agent: Brand-compliance AI agent (LangGraph.js + Next.js + Azure OpenAI Vision): uploaded posters are checked against the corporate Brand Book (colour, font, logo, layout) and violations flagged. • Helpdesk RAG: Helpdesk RAG chatbot using Dify Knowledge Base + Azure OpenAI: hybrid vector/keyword retrieval, reranking and source citations for grounded answers. • Department systems: Suite of department systems in PHP/Next.js — report portal replacing PowerBI (6 units), tender-evaluation scoring, escort-service booking x3 units, volunteer hub (9 units), asset/contract & stocktake management.
Aug 2023 - Jun 2024	Junior Programmer CL Technical Services Limited · Client: Innovation and Technology Commission • Supported the Project Manager on an InnoHK IT system: requirements, function design, data migration, SIT/UAT and maintenance for the Research Clusters Division.

EDUCATION

2019-2023	The Hong Kong University of Science and Technology (HKUST) BEng Computer Engineering · Second Class Honours Division I
2017-2019	Community College of City University Associate of Science, Network & System Administration · Distinction
2015	HKSYCIA Wong Tai Shan Memorial College Hong Kong Diploma of Secondary Education (HKDSE)
